

# SMITHS OF THE FUTURE

When we have completed the separation of Smiths Interconnect and Smiths Detection, the future company will have these characteristics:

World-class engineering company specialising in high performance technologies for efficient flow and heat management

Leading positions in attractive, growing markets, aligned with structural mega-trends

Valued customer relationships with customised products and solutions

Coherent operating model with a focus on operational excellence and a streamlined cost base

Strong financial profile of sustainable growth, high returns and good cash generation with low capital intensity
